

DEV DARJI

Full-Stack Developer | AI/ML Enthusiast

Kadi, Gujarat, India | +91 9510473018 | darjidev2504@gmail.com | [linkedin.com/in/dev-darji](https://www.linkedin.com/in/dev-darji)

PROFILE SUMMARY

Full Stack and Python Developer with hands-on experience building modern web applications using HTML, CSS, JavaScript, Node.js, and MongoDB. Strong foundation in Python, C++, and Java, with a growing focus on AI/ML fundamentals including data processing, machine learning algorithms, and intelligent system design. Passionate about building scalable, user-friendly applications and integrating AI-driven features to solve real-world problems.

TECHNICAL SKILLS

- Languages:** C, C++, Java, Python
- Frontend:** HTML5, CSS3, JavaScript, Responsive Design, UI/UX Basics
- Backend:** Node.js, REST APIs, TypeScript, PHP
- Databases:** MySQL, MongoDB, Firebase (Basics)
- Tools & Platforms:** Git, GitHub, VS Code
- Soft Skills:** Problem Solving, Leadership, Teamwork, Communication, Time Management

EXPERIENCE

Student Developer — Self-Initiated Projects | 2024 - Present

- Explored AI/ML concepts using Python, including data processing, basic machine learning algorithms, and intelligent decision-making systems.
- Applied logical and analytical thinking to build applications that simulate smart behavior and automation.
- Strengthened programming skills in Python, C, C++, and Java to support AI/ML learning.
- Built web applications and integrated intelligent features into user-focused systems.
- Continuously learning machine learning fundamentals while working toward real-world AI-driven applications.

PROJECTS

DevoraAI | [View on GitHub](#)

React.js, Tailwind CSS, Framer Motion, Zustand, Node.js, Express.js, FastAPI, MongoDB Atlas, Gemini 3.5 Flash, FLUX.1

- Built an enterprise-grade, full-stack AI assistant dashboard styled with a modern dark theme and glassmorphic panels, consolidating multiple generative and analytical models into a single local workspace.
- Integrated streaming conversational reasoning, AI image generation, voice synthesis, and document evaluation into one unified assistant platform.
- Engineered the frontend with React.js, Tailwind CSS, Framer Motion, and Zustand for smooth animations and responsive state management.
- Developed the backend with Node.js, Express.js, and FastAPI, integrating Gemini 3.5 Flash and FLUX.1 models with MongoDB Atlas for data persistence.

Skill Swap AI | [Live Demo](#)

Next.js, FastAPI, Python, MongoDB, Tailwind CSS, WebSockets, Gemini AI, Git

- Developed a full-stack, AI-powered peer-to-peer collaborative skill exchange platform that dynamically connects individuals looking to exchange knowledge and trade skills.
- Engineered an intelligent partner-matching algorithm using Python, FastAPI, and Gemini AI to automatically analyze user profiles, expertise levels, and learning goals to suggest optimal matches.
- Implemented low-latency, real-time messaging and collaborative workspace channels by developing a custom communication layer using native WebSockets on FastAPI.
- Designed a high-performance, responsive UI/UX with Next.js and Tailwind CSS, integrated with a scalable MongoDB database schema to track user skill progression, schedules, and active match states.

CampusFind Pro | [Live Demo](#)

- Built a secure, full-stack Lost & Found portal for academic institutions to help students report, track, and recover lost property.

- Powered the backend with PHP 8+ integrated with MongoDB Atlas, including a custom recursive BSON query parser for automatic ObjectId translation.
- Implemented Google OAuth 2.0 single sign-on, dynamic profile photo repair, and transactional email notifications via Brevo REST APIs.
- Delivered a responsive, glassmorphic UI with Bootstrap 5, protected by anti-CSRF tokens and role-based route authorization.

IRVision AI | [Live Demo](#)

- Developed an AI-powered infrared satellite image enhancement and colorization platform using React, FastAPI, PyTorch, and MongoDB.
- Implemented image upload and AI processing pipelines, Google Authentication, JWT authentication, and before-after image comparison.
- Designed a modern, responsive UI with secure user management and download functionality for satellite image analysis.

Developer Portfolio Website | [Live Demo](#)

- Developed an interactive 3D portfolio using HTML, CSS, JavaScript, and Three.js.
- Designed modern UI/UX with smooth animations, responsive layouts, and immersive 3D effects.
- Showcased projects, skills, certifications, and resume with intuitive navigation, optimized for performance and cross-browser compatibility.

RFID-Based Attendance System | [View LinkedIn Post](#)

- Built an RFID-based attendance system using Arduino and the RC522 module.
- Automated attendance tracking using RFID tags and learned embedded systems and hardware integration.

EDUCATION

B.Sc. IT, Computer Science — GSL University | 2024 - Present

High School — Shiv Hari English Medium School, Kadi
